We added a password to the Frame assembly PDF because too many people skipped the Change to design document in the outer folder called "***1. READ-ME FIRST - Changes to design***" and caused themselves a LOT of time wasted.

You MUST read the "***1. READ-ME FIRST - Changes to design***" document to save yourself time and heartache.

Please navigate up 1 level until you see the "***1. READ-ME FIRST - Changes to design***" document.

You are Here, Click the highlighted arrow to go back a folder level:

Now open this file and read it thoroughly. The password is at the end. Make sure to read it all please for yours and our support team sanity.
